Parador Stone

Engineered Wood Flooring

fuseflooring.com

**FU
SE** WOOD FLOORING

Product

| | |
|------------|-------------|
| Collection | Parador |
| Name | Stone |
| Style | Plank |
| Finish | Natural Oil |
| Surface | Brushed |

Wood

| | |
|---------------|---------------------|
| Species | White Oak |
| Treatment | Stained |
| Grade | Natural |
| Cut | Flatsawn |
| Hardness | 1360 (Janka scale*) |
| Colour change | Slight lightening |

Construction

| | |
|------------|-------------------------|
| Type | Engineered hardwood |
| Layers | 3-layer |
| Edge | Bevel 4-sides |
| Connection | Drop and lock ('click') |
| Dimensions | 13 x 185 x 2200 mm |

Layers

| | |
|------------------|------------|
| Lamella Material | White Oak |
| Thickness | 3 mm |
| Core Material | Spruce |
| Thickness | 9 mm |
| Backing | Spruce Ply |

Relative wood hardness

Notes

Wood colour variation

All wooden floors have natural colour variation. Untreated floors will have some colour variation, depending on the species. Stained floors generally have less colour variation. Smoked floors have more colour variation. Please be aware of the amount of variation to expect by looking at the 'wood - treatment' section, or contact a sales representative for pictures and further information.

Wood colour change

Wood changes colour when exposed to sunlight. This process is called 'oxidization' and happens over a period of several months to several years, depending on the species. Different species will change different colours over different periods of time. Note that certain finishes also oxidize and this colour change is in addition to the wood's oxidization.

Wood hardness

The Jenka hardness scale is determined by the amount of force required to embed an 11 mm steel ball half-way into the wood. A higher rating is a harder wood. Note that this does not indicate a product's resistance to scratching, just denting.
